Re: New Hampshire PUC Docket # DE 09-008

Dear Ms. Reno:

Enclosed please find an application to certify the electrical energy of Indeck Alexandria ("Alexandria") that is used in the generation (manufacturing) of power as renewable energy qualifying for the New Hampshire Class I RPS requirement. If this application is approved by the New Hampshire Public Utilities Commission, the renewable energy of Alexandria that is consumed by Alexandria's parasitic load would be reported to the NEPOOL Generation Information System under GIS account Non-32836 by William P. Short III, an Independent Monitor. This application would grant equal treatment to Alexandria that the owners of other New England biomass plants presently receive as the result of a more complicated metering and station service arrangement with their local utility.

The names and addresses of the Contacts for the Applicant, Indeck Energy - Alexandria, LLC ("Indeck") are as follows:
